

D W G I N T E R I O R S

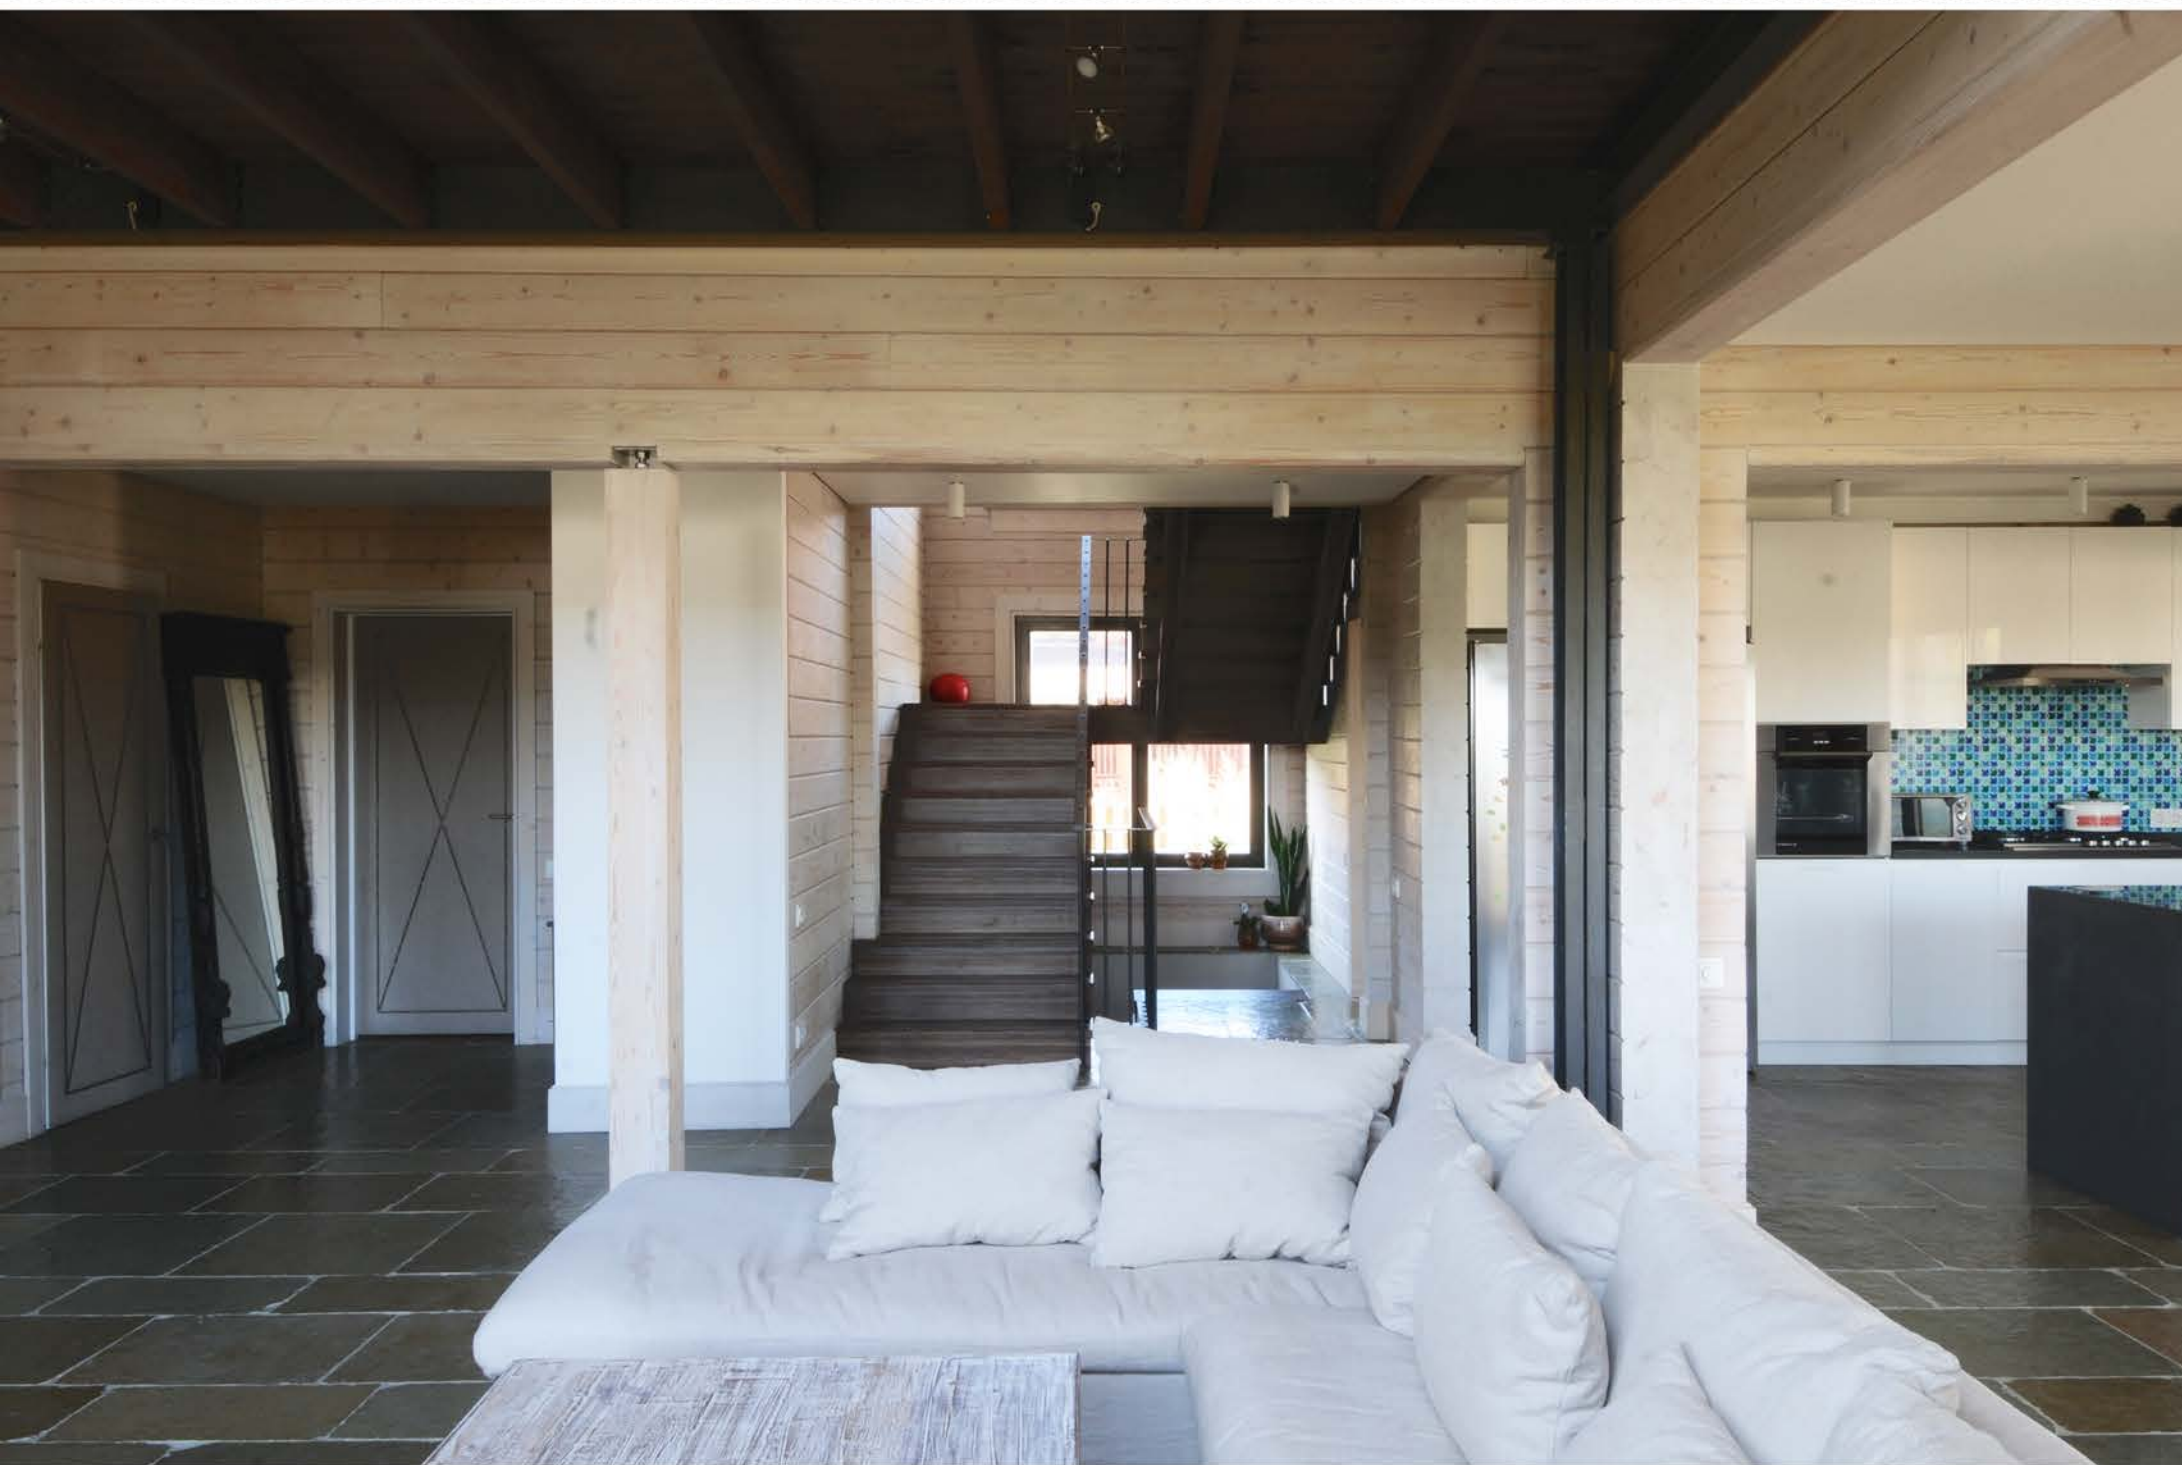

For more than ten years the architectural group “dwg interiors” has been creating individually tailored solutions for residential and commercial projects with the inspirational environment that reflects our clients' lifestyles. We are comfortable working in different styles, we love putting them together within an overall concept and pay particular attention to detail. This is critical to creation of a unique atmosphere. Working closely with talented structural and environmental engineers; landscape designers; art, furniture and antique professionals, we are ensuring that our artistic vision is fully expressed. We aim to create spaces with an impeccable balance of style, comfort and functionality. Spaces that raise the quality of life and bring a good return on the investment.
